FCC-MAILROOM

Dear Sir,

I am blind and can not read phone book or use innernet. I am concerned that Voice over innernet, phone companies, etc. are not giving local and long distance directory assistance to blind persons. Phone companies do give free local directory service which is a great blessing.

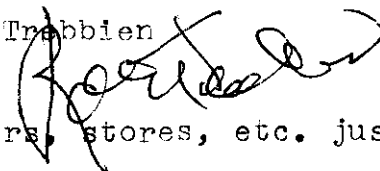

My friend, some tell me I should be treated no differently than a sighted person. If anyone believes that, then please have them put on blinders for four or five days during their vacations and try to get phone numbers from anywhere - innernet or any other way.

The spirit of the Americans with Disability Act mandate that blind receive free directory service from any one who offers phone service.

Please do not forget the blind persons.

Sincerely,

Ray Trabbien

The blind need to call doctors, helpers, stores, etc. just as anyone.
